

AI Skin Disease Detection Report

Predicted Disease: Infestations_Bites

Confidence: 18.99%

Timestamp: 2026-06-26 00:22:59

Description:

Skin irritation and rash caused by insect bites or small parasitic infestations, often leading to redness and itching.

Causes:

- Mosquito or flea bites
- Chigger exposure
- Scabies or lice infestations

Symptoms:

- Localized itching
- Red bumps or welts
- Small blisters or burrow tracks

Precautions:

- Do not scratch bite areas
- Keep the area clean
- See a provider if swelling increases
